

# G&D Integrated<sup>®</sup> **GD**

Smart. Efficient. Logistics.

## Transportation Services

*Turnkey services lower transportation costs, improve customer service and reduce cycle times.*

## Transportation Services

*Turnkey services lower transportation costs, improve customer service and reduce cycle times.*

G&D Integrated can execute a broad array of transportation services. We are experts in identifying and developing custom, dedicated transportation services to optimize the flow of goods in global supply chains.

**Dedicated Transportation.** With our own extensive fleet of power units, chassis, trailers, flatbeds, curtain sides and customized equipment as well as a team of experienced drivers, we ensure efficient and professional service for a wide range of client transportation needs.

**Brokerage Services.** Along with asset-based transportation services, G&D Integrated offers non-asset based services including management of freight services around the U.S. via van or flatbed, management of transport for import and export loads via rail or truck, arrangement of movements of oversized cargo via multiple transportation modes and arrangement of movements of hot loads, all to meet specific customer requirements.

**Shipment Planning.** Managing shipment planning for optimal efficiency across all transportation services, we help reduce costs and increase speed of deliveries.

**End-to-End Load Matching.** Increasing cargo efficiency by matching each load to available freight capacity means clients save time and money.

**Driver Route Management.** With broad experience and expertise in orchestrating routes, we incorporate delivery windows, delivery appointments, load/unload times and trailer utilization.

**Traffic Analysis.** Constantly analyzing traffic throughout the supply chain enables us to reduce costs through optimal flow and equipment utilization.

**Intermodal Drayage.** G&D Integrated offers intermodal drayage services, assuring shipments are efficiently moved on time to their destination.

**Chassis Pool Provision.** Customers have access to 20', 40' and tri-axle chassis pools providing flexibility to meet a wide range of shipping requirements.

**Container Depot Services.** We provide high-quality inspection, lift and storage of TOFC &/or COFC containers.

**Container Storage.** Long-term and short-term secured storage options for shipping containers match fluctuations in clients' supply chains.
